Frequently Asked Questions

1. Where does Dr. Soma Madhan Reddy practice?

Dr. Soma Madhan Reddy is a practicing physician at Apollo Health City, Jubilee Hills. This hospital offers comprehensive healthcare services.

2. Who is Dr. Soma Madhan Reddy?

Dr Soma Madhan Reddy is a renowned Neurosurgeon with over 7 years of experience. He practices in Hyderabad at Apollo Health City Jubilee Hills. Dr Soma Madhan Reddy holds a degree in MBBS, MS (Gensurg), DNB (Neurosurgery). He provides treatments including Adopted Child Syndrome Treatment, Skull Treatment, Trigeminal Neuralgia Treatment. He specializes in treating conditions like Moyamoya Disease, Craniosynostosis, Epilepsy.

3. What is Dr. Soma Madhan Reddy's specialization?

Dr Soma Madhan Reddy specializes in Neurosurgery. He has expertise in treating conditions such as Moyamoya Disease, Craniosynostosis, Epilepsy. His key treatments include Adopted Child Syndrome Treatment, Skull Treatment, Trigeminal Neuralgia Treatment.

4. What are Dr. Soma Madhan Reddy's medical qualifications?

Dr Soma Madhan Reddy holds MBBS, MS (Gensurg), DNB (Neurosurgery), reflecting his comprehensive education in the field of Neurosurgery.

5. What is Dr. Soma Madhan Reddy's experience?

Dr. Soma Madhan Reddy has 7 years of experience as a Neurosurgeon. His professional history provides comprehensive expertise in neurosurgical care.

6. Who is a neurosurgeon?

A neurosurgeon is a specialized physician trained in the diagnosis and treatment of disorders affecting the brain, spinal cord, and nerves. They are experts in neurosurgery.

7. Can a neurosurgeon remove brain tumors?

Yes, neurosurgeons perform brain tumor removal surgery, a procedure known as craniotomy. This surgical technique is a specialized area of neurosurgery.

8. Does a neurosurgeon only perform surgery?

While neurosurgeons are highly skilled in complex brain and spine surgery, they prioritize non-surgical treatments whenever feasible. Medication is the first line of defense; surgery is considered only when medical management proves ineffective.

9. Which conditions require a neurosurgeon?

A neurosurgeon should be consulted for conditions such as birth defects, brain or spinal trauma from accidents or injury, brain tumors, vascular disorders, spinal or brain infections, stroke, and degenerative spinal diseases like multiple sclerosis. Neurological symptoms necessitate expert medical evaluation.

10. Can a neurologist treat nervous system birth defects?

Neurologists do not treat congenital nervous system defects. Neurosurgeons, however, perform surgeries on such birth defects affecting the brain and spinal cord in infants and children.
