Frequently Asked Questions

1. Where does Dr. Jony Agarwal practice?

Dr. Jony Agarwal's practice is located at Apollomedics Super Specialty Hospitals. This hospital offers comprehensive healthcare services and advanced medical expertise.

2. Who is Dr. Jony Agarwal?

Dr Jony Agarwal is a renowned Nephrologist with over 4 years of experience. He practices in Lucknow at Apollomedics Super Specialty Hospitals. Dr Jony Agarwal holds a degree in MD (Internal Medicine), DM (Nephrology). He provides treatments including Dialysis, Kidney Transplant, Blood Pressure Management. He specializes in treating conditions like Nephrotic syndrome, Polycystic kidney disease, Acute Renal Failure.

3. What is Dr. Jony Agarwal's specialization?

Dr Jony Agarwal specializes in Nephrology. He has expertise in treating conditions such as Nephrotic syndrome, Polycystic kidney disease, Acute Renal Failure. His key treatments include Acute Diarrhea Treatment, Acute Kidney Disease Aki Treatment, Nephrotic Syndrome Treatment.

4. What are Dr. Jony Agarwal's medical qualifications?

Dr Jony Agarwal holds MD (Internal Medicine), DM (Nephrology), reflecting his comprehensive education in the field of Nephrology.

5. How many years of experience does Dr. Jony Agarwal have?

Dr. Jony Agarwal has 11 years of experience in neurology.

6. Who is a nephrologist?

A nephrologist is a kidney specialist, a physician trained to diagnose and treat kidney diseases in both adults and children. This includes managing complications from kidney dysfunction.

7. Can a nephrologist treat a urinary tract infection (UTI)?

While a general practitioner can manage UTIs, a nephrologist's expertise is valuable for complex cases. If recurrent UTIs suggest an underlying kidney condition, a nephrologist can diagnose the root cause and provide appropriate treatment, especially if kidney damage is suspected. Their specialized knowledge ensures effective management of kidney-related UTI complications.

8. Does a nephrologist perform kidney transplants?

Kidney transplant surgery is performed by a surgeon specializing in kidney conditions. Nephrologists provide crucial medical management before and after the transplant but do not conduct the surgical procedure. Their role focuses on pre- and post-operative care for kidney transplant patients.

9. What symptoms require a nephrologist visit?

Consult a nephrologist if you experience: reduced urination, leg/foot/ankle swelling, fatigue, shortness of breath, nausea, painful urination, hematuria (blood in urine), pyuria (pus in urine), or a history of kidney/bladder stones. These symptoms may indicate kidney disease requiring specialist care.

10. Can a nephrologist treat kidney stones?

Yes, nephrologists specialize in kidney disease and are qualified to treat kidney stones. Treatment may involve blood and urine tests, X-ray and ultrasound examinations, followed by a tailored treatment plan.
