7. Who is an Orthopaedist?

An orthopaedist is a medical doctor specializing in diagnosing and treating musculoskeletal disorders. They manage conditions affecting bones, muscles, joints, and ligaments, including arthritis, back pain, sports injuries, and leg/foot pain. Orthopaedic specialists provide comprehensive care for skeletal system injuries and diseases.

8. What is the difference between an Orthopaedist and an Orthopaedic Surgeon?

While often used interchangeably, orthopaedists and orthopaedic surgeons have distinct roles. An orthopaedist manages musculoskeletal system disorders, offering pre- and post-surgical care. An orthopaedic surgeon performs the same duties, but also carries out surgical procedures for conditions like back pain, disc ruptures, bone tumors, carpal tunnel syndrome, arthritis, and other injuries. Both specialize in musculoskeletal health.

9. Does an Orthopedist treat foot and ankle problems?

Yes, orthopedists specialize in musculoskeletal health, encompassing foot and ankle conditions. They treat various foot and ankle issues, including bunions, sprains, arthritis, and sports injuries. Diagnosis utilizes imaging techniques, and treatment methods vary depending on the condition's severity. Orthopedic care provides comprehensive solutions for foot and ankle disorders.
