# Frequently Asked Questions

## 1. Where does Dr. Rahul Jain practice?

Dr. Rahul Jain's medical practice is located at Apollo Sage Hospitals. This hospital offers comprehensive healthcare services.

## 2. Who is Dr. Rahul Jain?

Dr Rahul Jain is a renowned Neurosurgeon with over 13 years of experience. He practices in Bhopal at Apollo Sage Hospitals. Dr Rahul Jain holds a degree in MBBS, MS, M. Ch. Neurosurgery. He provides treatments including Craniotomy, Spinal Decompression Surgery, Ventriculoperitoneal (VP) Shunt. He specializes in treating conditions like Moyamoya Disease, Craniosynostosis, Epilepsy.

### **3. What is Dr. Rahul Jain's specialization?**

Dr Rahul Jain specializes in Neurosurgery. He has expertise in treating conditions such as Moyamoya Disease, Craniostenosis, Epilepsy. His key treatments include Skull Treatment, Trigeminal Neuralgia Treatment.

### **4. What are Dr. Rahul Jain's medical qualifications?**

Dr Rahul Jain holds MBBS, MS, M. Ch. Neurosurgery, reflecting his comprehensive education in the field of Neurosurgery.

### **5. How many years of experience does Dr. Rahul Jain have?**

Dr. Rahul Jain possesses 20 years of experience in neurosurgery.

### **6. Who is a neurosurgeon?**

A neurosurgeon is a medical doctor specializing in the diagnosis and surgical or medical treatment of nervous system disorders. These disorders include brain and spinal cord injuries, infections, and inflammation. Neurosurgery encompasses a wide range of conditions affecting the brain, spine, and nervous system.

### **7. Can a neurosurgeon operate on a brain tumor?**

Yes, neurosurgeons specialize in brain and nervous system surgery. They are qualified to perform brain tumor removal surgery, either partially or completely, depending on the tumor's location.

### **8. Does a neurosurgeon only perform surgery?**

No. Neurosurgeons provide comprehensive neurological care. Their roles extend beyond surgery to include patient rehabilitation following neurosurgery and consultations in emergency situations involving neurological complications.

### **9. Which diseases require a neurosurgeon?**

A neurosurgeon treats various neurological conditions, including brain bleeds, paralysis, spinal disorders, brain tumors and cancers, seizures, severe pain, Parkinson's disease, spinal or nerve injuries, and multiple sclerosis. Consult a neurosurgeon for expert diagnosis and treatment of these conditions.

### **10. Can a neurologist treat nervous system birth defects?**

Neurologists collaborate with neurosurgeons; however, they do not perform surgery. Surgical intervention is often necessary for many birth defects. Therefore, a neurologist's treatment alone is insufficient for such conditions.
