8. Who is a Pediatrician?

A pediatrician, also known as a child specialist, is a medical doctor specializing in children's healthcare. They manage the physical, behavioral, and mental well-being of children, treating illnesses ranging from minor conditions to severe disorders. Pediatric care begins at birth.

9. What age range of children do your Paediatricians treat?

Our Paediatricians provide comprehensive care for children from birth through age 18. Infants (0-2 years) may require frequent visits, while children aged 2-5 typically need annual well-child checkups. Annual visits are recommended for children up to age 18.

10. Can a Pediatrician Perform Surgery?

Pediatricians focus on children's physical and mental health. While some pediatricians may have surgical training and perform procedures, pediatric surgeons specialize in surgical interventions for children, ranging from minor procedures (e.g., foreign body removal) to complex surgeries (e.g., cardiac surgery). Pediatricians primarily provide non-surgical care and treatment.
