#### **6. How many years of experience does Dr. Ravi G R have?**

Dr. Ravi G R has over 25 years of experience in diabetology. His extensive experience spans various medical settings.

#### **7. Who is a General Physician?**

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases and conditions affecting the cardiovascular, respiratory, neurological, haematological, endocrine, and gastrointestinal systems, excluding those requiring surgery. Some GPs may develop sub-specialties within these systems.

#### **8. What are the education requirements to become a General Physician?**

General physicians, also known as primary care physicians, require completion of medical school followed by a 3-year residency in primary care. Prerequisites include a science-based bachelor's degree, a minimum GPA, and successful completion of basic medical training. This rigorous training ensures qualified healthcare professionals in primary care.

#### **9. When should I consult a General Physician?**

Consult a general physician for a wide range of non-surgical health concerns. These include issues affecting the cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine systems. A GP is often the first point of contact for most health problems.

#### **10. Do General Physicians offer home consultations?**

General practitioners (GPs) provide comprehensive healthcare, including physical exams, immunizations, and treatment for various medical conditions. GPs often maintain long-term patient relationships and treat diverse age groups. Home consultations are at the discretion of the individual physician; however, routine check-ups may be available at home. This service depends on physician availability and patient needs.
