6. How many years of experience does Dr. Sangamithray D have?

Dr. Sangamithray D possesses 41 years of experience in the medical field.

7. Who is a Gynaecologist?

A gynecologist is a medical doctor specializing in women's reproductive health. This includes the vagina, ovaries, uterus, and breasts. Gynecologists also receive training in obstetrics, managing pregnancy and childbirth.

8. What is the difference between a Gynaecologist and an Obstetrician?

A Gynaecologist manages women's reproductive health, while an Obstetrician focuses on pregnancy, childbirth, and postpartum care. Many Gynaecologists also have obstetrics training. Pregnant women can see either; however, Gynaecologists are the appropriate specialists for female reproductive system issues.

9. What procedures do Gynaecologists and Obstetricians perform?

Gynaecologists commonly perform procedures such as Dilation and Curettage (D&C), removing the uterine lining via suction or curette, and Hysteroscopy, a minimally invasive treatment for uterine conditions. Obstetricians manage childbirth, including normal deliveries and Cesarean sections (C-sections) when complications arise, ensuring safe delivery for mother and child. These specialists provide comprehensive women's health care.

10. Does a Gynecologist/Obstetrician treat female infertility?

Yes, Gynecologists/Obstetricians are qualified to manage infertility and associated women's health concerns. A consultation allows for infertility evaluation, diagnosis, and exploration of treatment options. Referral to specialists occurs when necessary.
