8. Who is an Ophthalmologist?

An ophthalmologist is a medical doctor specializing in comprehensive eye care and vision. Unlike other eye care professionals, ophthalmologists treat a wide range of eye disorders and related conditions. Their medical background allows them to refer patients to other specialists when necessary, even for non-eye-related issues.

9. Is an Ophthalmologist different from an Optometrist?

Yes, ophthalmologists and optometrists offer distinct eye care services. Optometrists manage common eye conditions and some chronic diseases such as glaucoma. Ophthalmologists address a broader range of eye disorders, including complex conditions requiring surgical intervention.

10. Can an Ophthalmologist perform eye surgery?

Yes, ophthalmologists are qualified surgeons. Their extensive training encompasses various surgical subspecialties such as eyelid, retinal, and pediatric ophthalmic surgery. Surgical practice may also vary based on hospital or surgical center needs.
