8. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may develop sub-specialties within these systems.

9. What are the educational requirements to become a General Physician?

General physicians, also known as primary care physicians, require completion of medical school followed by a primary care residency. Prerequisites include a science-based bachelor's degree, a minimum GPA, successful medical school completion, and basic medical training. A three-year residency commitment is mandatory.

10. When should I consult a General Physician?

A general physician addresses various health concerns, acting as the initial point of contact for most medical needs. They manage non-surgical conditions impacting the cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine systems. Consult a general physician for symptoms related to these systems.

11. Do General Physicians offer home consultations?

General practitioners (GPs) offer comprehensive primary healthcare, including physical examinations, immunizations, and treatment for various medical conditions. They manage patients across age groups. Home consultation availability depends on the individual GP's practice; however, routine check-ups may be offered at home.
