Overview

Dr. V Viswanathan is a highly skilled Paediatric Neurologist with over 28 years of extensive experience in diagnosing and treating neurological disorders in children. Based in Chennai, Tamil Nadu, Dr. Viswanathan has dedicated his career to understanding the complexities of paediatric neurology, ensuring that he provides the highest standard of care for his young patients. His qualifications include an MBBS, DCH, MRCP, and a PhD, showcasing his deep commitment to medical education and research within the field. Dr. Viswanathan is fluent in multiple languages, including English, Hindi, Tamil, and Malayalam, allowing him to communicate effectively with a diverse patient base and ensure that families feel comfortable and understood during consultations. At Apollo Hospitals, he has earned a reputation for his compassionate approach and thorough diagnostic skills. His clinical expertise encompasses a range of neurological conditions, enabling tailored treatment plans that consider the unique needs of each child. Dr. Viswanathan strongly believes in the importance of family involvement in the treatment process, often providing guidance and support not just to patients but also to their families as they navigate through challenging health situations.

5. How many years of experience does Dr. Viswanathan V have?

Dr. Viswanathan V possesses 37 years of experience in the medical field.

6. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may develop sub-specialties within these systems.

7. What are the educational requirements to become a General Physician?

General physicians, also known as primary care physicians, require completion of medical school followed by a 3-year residency in primary care. Prerequisites include a science-based bachelor's degree, a minimum GPA, and successful completion of medical school and basic medical training.

8. When should I consult a General Physician?

Consult a general physician for various health concerns, including cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine system issues, excluding those requiring surgery. A GP is your first point of contact for most health problems.

9. Do General Physicians offer home consultations?

General practitioners (GPs) provide comprehensive primary care, including physical exams, immunizations, and treatment for various medical conditions across all age groups. Home consultations are offered at the discretion of the individual GP. Routine check-ups may be available at a patient's home.

10. Can a General Physician perform surgery?

No. General physicians specialize in primary care, providing non-surgical treatment for illnesses and injuries. Surgical procedures are performed by general surgeons. Physicians focus on primary care, building patient relationships, and utilizing non-surgical methods such as medication and physical therapy.
