8. Who is an Orthopaedist?

An orthopedist is a medical doctor specializing in diagnosing and treating musculoskeletal disorders. They address conditions affecting bones, muscles, joints, and ligaments, including arthritis, back pain, sports injuries, and leg/foot pain. Orthopedic care encompasses the skeletal system and related structures.

9. What is the difference between an Orthopaedist and an Orthopaedic Surgeon?

While often used interchangeably, an orthopaedist focuses on musculoskeletal system conditions, offering pre- and post-surgical care. An orthopaedic surgeon provides identical care but also performs surgeries for conditions such as back pain, disc ruptures, bone tumors, carpal tunnel syndrome, and arthritis.

10. Do Orthopaedists treat foot and ankle issues?

Yes, orthopaedic specialists treat musculoskeletal conditions, including foot and ankle problems. They manage common conditions such as bunions, ankle sprains, arthritis, and sports injuries. Diagnosis involves imaging, and treatment varies depending on severity. Foot and ankle care is a key area of orthopaedic expertise.
