5. How many years of experience does Dr. Aritra Konar have?

Dr. Aritra Konar possesses 17 years of experience in cardiology. His professional history spans various medical institutions.

6. What does a Cardiologist do?

Cardiologists diagnose and treat heart and blood vessel diseases. Surgical cardiologists perform open-chest heart operations.

7. When should I consult a cardiologist?

Consult a cardiologist if you experience chest pain, shortness of breath, irregular heartbeat, high blood pressure, or dizziness. These are potential indicators of cardiovascular issues requiring expert medical attention.

8. What to expect at my first visit to a heart specialist?

Your first cardiology appointment will involve a comprehensive medical history review and physical examination, including blood pressure and heart rate measurements. A cardiac exam, potentially including an electrocardiogram (ECG), will assess your risk for coronary artery disease.

9. How do cardiologists diagnose blocked arteries?

Cardiologists utilize various diagnostic tests to identify blocked arteries. These include a stress electrocardiogram (ECG), 2D echocardiogram, CT scans, ultrasound, lipid profile testing, chest X-rays, and angiography.

10. Can I see a cardiologist directly?

Accessing a cardiologist depends on location and health insurance coverage. Direct access may be possible, though some plans require a referral from a general practitioner or primary care physician.

Please check your specific healthcare plan for details.
