Overview

Dr. Dharmendra Singh is a highly qualified and experienced Paediatric Surgeon based in Noida, Uttar Pradesh. With 22 years of expertise in the field, Dr. Singh has dedicated his career to the surgical care of children, honing his skills in addressing a wide range of complex medical conditions. His commitment to excellence is reflected in his active participation in numerous annual conferences of the Indian Association of Pediatric Surgeons. Notable presentations include innovative approaches to valve fulguration and the management of acardiac twins, as well as advancements in surgical techniques, such as Bianchi's method for treating gastroschisis. Dr. Singh has also contributed valuable research on topics like bowel preparation for primary pull-through procedures and the significance of serum C-3 levels in generalized peritonitis. Fluently conversant in English, he communicates effectively with families to ensure a clear understanding of treatment plans and surgical processes. His dedication to paediatric surgery not only involves technical proficiency but also a compassionate approach towards both patients and their families. As a recipient of multiple accolades for his contributions to medical science, Dr. Singh stands out as a leading figure in paediatric surgery within the region, providing exceptional care and outcomes for his

young patients. At Apollo Hospitals, he continues to make significant strides in improving paediatric surgical care, striving to enhance the well-being and health of children under his care.
